# CONWAY BENSON SOFTWARE DEVELOPER | PYTHON | DJANGO | BACKEND SYSTEMS

Arlington, VA | 231-349-8986 | ConwayMBenson@gmail.com | GitHub: https://github.com/waycon86
Portfolio: ConwayMBenson.dev

## PROFESSIONAL PROFILE

Software developer with hands-on experience building backend applications and operational platforms using Python, Django, PostgreSQL, REST APIs, and cloud deployment workflows. Built and deployed production-style applications featuring authentication systems, dashboards, employee management workflows, PDF ingestion pipelines, mobile packaging, and database persistence. Background includes emergency medical services, business ownership, and technical operations, bringing structured problem solving, decision-making under pressure, customer communication, and operational leadership into software development. Experienced with Linux environments, Git workflows, analytics tools, deployment pipelines, and full application lifecycle management.

## PROFESSIONAL EXPERIENCE

Asurion – Retail Sales Technician
Arlington, VA | 2025–2026

- Supported secure endpoint environments by diagnosing and resolving software and hardware issues across iOS and Android devices, with a focus on protecting user data and maintaining system integrity.
- Performed controlled access and configuration activities, including SIM/eSIM provisioning and system resets, following defined authentication and authorization procedures.
- Executed firmware updates, system configurations, and recovery actions in accordance with internal standards to preserve the confidentiality, integrity, and availability of devices and data.
- Documented technical actions, findings, and resolutions in centralized ticketing and CRM systems, creating audit-ready records to support review, accountability, and quality assurance.
- Identified recurring technical issues and contributed to root cause analysis, supporting improvements in reliability and reduction of repeat incidents.
- Communicated technical findings and recommended actions clearly to customers and supervisors, balancing security requirements with service delivery needs.

American Medical Response (AMR) – Emergency Medical Technician
Colorado Springs, Colorado / Washington, DC | 2022–2024

- Operated in high-risk environments requiring strict adherence to protocols, confidentiality standards, and accurate documentation.
- Conducted real-time risk assessment and situational analysis, synthesizing information from multiple data sources (patient history, medication lists, observed symptoms) to determine appropriate response actions.
- Identified medication-related risk indicators by reviewing and reconciling patient medication information, including cases involving conflicting prescriptions from multiple providers.
- Analyzed discrepancies in patient-reported data and escalated potentially high-risk findings to emergency department physicians to support informed clinical decision-making and patient safety.
- Produced precise, compliant documentation capturing findings, actions taken, and escalation decisions to support accountability, traceability, and post-incident review.
- Communicated complex, sensitive information clearly and concisely to multidisciplinary teams under time constraints.
- Maintained composure and sound judgment during incidents involving elevated risk, uncertainty, and time pressure.

Benson Move, LLC – Owner / Operator
Colorado Springs, Colorado | 2021–2022

- Founded and managed a small business with responsibility for operational planning, risk management, and service continuity across multiple job sites.
- Analyzed traffic patterns, timing constraints, and route conditions to plan safe and efficient move operations, minimizing delays and operational risk.
- Performed cross-data analysis to determine appropriate moving equipment, staffing levels, and handling techniques based on object size, weight, access points, and environmental conditions.
- Evaluated start/stop logistics for complex moves, coordinating sequencing to reduce safety risk, equipment strain, and service disruption.
- Applied structured problem-solving and decision-making techniques to adjust plans in real time when conditions changed (weather, access limitations, schedule conflicts).
- Developed and refined standard operating procedures (SOPs) for loading, securing, transporting, and unloading objects to improve consistency, safety, and reliability.
- Served as primary point of contact for clients, clearly communicating plans, risks, timelines, and corrective actions when issues arose.

**TECHNICAL PROJECTS**

**Training Hub / AppBar**

**Python | Django | PostgreSQL**
**Render | JavaScript | Capacitor**

- **Key Features**
  - Employee authentication & profiles
  - Training modules & knowledge tracking
- **Quiz platform**
  - PDF ingestion workflows
  - PostgreSQL persistence
  - Operational dashboards
  - Progressive Web App
  - Android / iOS packaging
  - Production deployment

ConwayMBenson.dev

**React | Vite | JavaScript**

- **Responsibilities**
  - Portfolio website
  - Resume integration
  - Deployment workflows
  - Project showcase

**TECHNICAL SKILLS & CERTIFICATIONS**

- **Operating Systems**
  - Linux (Ubuntu)
- **Programming, Scripting & Backend**
  - Python | JavaScript | HTML | CSS
  - Django
  - REST APIs
- **Version Control**
  - Git | GitHub
- **Data & Databases**
  - SQL fundamentals | NoSQL fundamentals
  - PostgreSQL
  - R Data Science
  - Tableau
- **IT Operations & Systems**
  - System troubleshooting and diagnostics
  - Device configuration and recovery
  - Workflow documentation and audit-ready recordkeeping
  - Render
  - Capacitor
  - Progressive Web Apps (PWA)
- **Business & Service Platforms**
  - Salesforce | ServiceBench
- **Certifications & Credentials**
  - WISE Level 1 Technician (Mobile Devices)
  - Emergency Medical Technician (EMT-B)
  - Fire I & II | CPR / First Aid

EDUCATION-Emergency Medical Technician – Pikes Peak State College, CO (2023)
Associate of Applied Science, Fire Science – Mid Michigan College (2014)
VOLUNTEER SERVICE - Volunteer Deerfield Fire Department (2012-2014)
